Career Objective

Aspiring tech professional seeking an entry-level position in a dynamic organization where I can leverage my skills in full-stack development and continuously grow by learning new technologies. Eager to contribute to impactful projects, collaborate with teams, and build real-world solutions while advancing my career in the ever-evolving tech industry.

Technical Skills

• Frontend: HTML, CSS, Bootstrap
• Backend/Programming: Python, Java
• Database: SQL
• Libraries/Tools: Pandas, NumPy, Matplotlib

Education

Bachelor of Technology – Computer Science and Engineering
Vaagdevi College of Engineering (2021–2025)
CGPA: 7.43

Projects

1. Static & Responsive Websites (HTML, CSS, Bootstrap)
Created multiple responsive static websites to enhance UI/UX understanding and practice frontend development.

2. Deep Learning Framework for Online Loan Fraud Prevention (Python, ML)
Built a fraud detection system using Python and ML libraries. Applied data analysis techniques to identify fraudulent online loan applications.

3. Hotel Booking & Credit Card Simulation (Python)
Developed Python-based applications to simulate hotel booking and credit card features to improve logic building.

Certifications

• Python – HackerRank
• SQL – HackerRank

- Build Your Own Responsive Website – NxtWave
- Build Your Own Static Website – NxtWave
